## CONCLAVE ON TRANSLATIONAL RESEARCH OPPORTUNITIES IN AYURVEDA

IASTAM (Indian Association for the study of Traditional Asian Medicine) is the multidisciplinary organization. IASTAM is a **pioneer of intellectual conclaves** and has **35 years** of activities & events at international & national level on subjects of significance. With the new theme '**Connecting Systems, Bridging Disciplines**' it is now committed to global healthcare with efforts to bridge the gaps of challenges with different dimensions.

IASTAM is credited with well-planned academic and scientific deliberations on various issues and challenges for development of Indigenous system of Medicine.

### *Thought provoking conclave on Translational Research Opportunities in Ayurveda*

Ayurved, a great heritage of traditional knowledge being the most ancient and still successfully practiced science amongst all these systems, needs a special attention while searching for solutions to the unresolved health problems. There exists a serious need to validate the uses of different therapeutic modalities which are in practice and can serve as a potent, safer and cost effective solution to many global disorders. Translational research applies findings from basic science to enhance human health and well-beings, a "bench-to-bedside", from laboratory experiments through clinical trials to point-of-care patient applications, model, and harnessing knowledge from basic sciences to produce new drugs, devices, and treatment options for patients. To meet these societal requirements, it is essential to develop a unique transnational research methodology. The recent paradigm shift demands research initiatives in the science of Ayurveda including exploration of more recent approaches and methodologies of therapeutic research, in order to enrich Ayurveda as it is, and to benefit Ayurvedic practitioners.

*This National Conclave translational research opportunity in Ayurveda is aimed to find out and identify national and global opportunities and newer scope for translation research and to develop modalities of research for Ayurved.*

It is structured to raise questions where the experts are expected to share their views and experiences, their approaches and outcomes and how to continue with further development.

#### CONCLAVE STRUCTURE

*Three Key Note Speeches  
Three Lead Speeches  
Three Panel Discussions  
Scientific Sessions*

#### CONCLAVE HIGHLIGHT

*Experts in various field and those who are actually involved in such activities will share their experiences in an open and interactive manner.*

*An Opportunity to Interact with Best of Experts*
