- National Debate – Therapeutic Pluralism-1997 (Proceedings in Newsletter)
- Seminar cum Workshop- Priorities in the Study of Indian Medicine & Relevant Research Methods - 1994
- ICTAM III (1990) & ACTAM (1984)

NOW ONE MORE THOUGHT PROVOKING SYMPOSIUM

“National Symposium on Integrative Research”

Innovation and research form the backbone of development of any science. ‘Integrative Research’ is identified as an essential tool to enable the Indigenous Systems of Medicine to develop and to be a part of main stream health care delivery system in India where medical pluralism is and will remain part of our culture.

Research activities are required to be redesigned to have meaningful contributions. Integration essentially means coming together of different schools of thought or streams of science. To define common objectives and to develop modalities of such research in itself is a challenging task.

This ‘National Symposium on ‘Integrative Research’ aims to define these approaches and to address related issues in the form of dialogue and interactive deliberations.

It is structured to raise questions where the experts are expected to share their views and experiences, their approaches and outcomes and how to continue with further development.

Do join for an interesting event.

SYMPOSIUM STRUCTURE:

I) Key Note address by well-known expert in the field.

II) Two Lead Speeches

III) Two Panel Discussions

Experts in various fields and those who have been actually involved with such activities will share their experiences in an open and interactive manner to help evolve such modalities.

A must for those interested in research and development of indigenous systems and for those in search of innovative developments or newer modalities where bridging the gap is vital.

- *IASTAM Awardees – as listed on next page are expected to actively participate*
- Rare opportunity to listen to several stalwarts on a common platform
